**If you put up a new building in our area you have to be concerned with trusses you use ...**

Our Hi Load Series trusses are rated at least 25% stronger than those specified by New York State. You may ask, "OK what does that mean to me?" What it means is compared to other trusses ours can withstand a snow load that's 25% heavier than a standard truss. And while that may not seem important during the heat of summer, come winter and those sudden snow-storms that dump feet of snow on our region you can rest easy knowing the roof on your building has the Hiload Series trusses that came from Eastern States Metal Roofing.

To, find out more about our Hi-load trusses simply stop by Eastern States Metal Roofing at 7820 Route 474 in Panama, NY or call 716-355-4374.
