- Flexible Shifts (Full/Part Time)
- Work Available Every Day
- On-The-Job Training
- Safety Focused
- Clothing & Boot Allowance

Founded in 1910, ELLWOOD Group began as a producer of high-quality steel and has grown into a trusted maker of crankshafts used around the world. We build heavy-duty cranks that keep equipment running every day.

We start by melting and refining our own steel, then forge crankshafts to shape using powerful presses. From there, each crank is carefully machined and inspected to meet exact requirements. Our crankshafts are used in tractors, locomotives, pumps, compressors, ships, power generation equipment, and military vehicles like tanks.

For more than 100 years, ELLWOOD has been built on hard work, craftsmanship, and doing the job right—values we continue to pass on to the next generation.

**If you put up a new building in our area you have to be concerned with trusses you use ...**

Our Hi Load Series trusses are rated at least 25% stronger than those specified by New York State. You may ask, "OK what does that mean to me?" What it means is compared to other trusses ours can withstand a snow load that's 25% heavier than a standard truss. And while that may not seem important during the heat of summer, come winter and those sudden snow-storms that dump feet of snow on our region you can rest easy knowing the roof on your building has the Hiload Series trusses that came from Eastern States Metal Roofing.

To find out more about our Hi-load trusses simply stop by Eastern States Metal Roofing at 7820 Route 474 in Panama, NY or call 716-355-4374.
